About Me

I am an enthusiastic and eager Junior DevOps Engineer with a foundational understanding of software development and operations. I am keen to expand my skills in (CI/CD) processes, cloud services, and automation tools. My goal is to contribute to a collaborative team environment, learn from experienced professionals, and apply my growing technical knowledge to support efficient & innovative projects.

Skills:

- Basic understanding of CI/CD pipelines.
- Familiarity with tools like Jenkins & GitHub.
- Proficiency with Git and GitHub/GitLab.
- Basic knowledge of cloud platforms such as AWS & Azure.
- Understanding of Docker and container orchestration with Kubernetes.
- Experience with Linux environments such as Ubuntu, RHEL & CentOS.
- Familiarity with virtualization technologies like VMware or VirtualBox.
- Skills in creating and maintaining technical documentation
